

## Be part of the largest international Dutch water network

For more than 25 years, the Netherlands Water Partnership connects the world with the expertise and knowledge of the Dutch water sector. Our strong alliance of the most innovative, entrepreneurial and renowned Dutch water sector members make NWP the point of call for anyone worldwide seeking collaboration and Dutch water expertise. Together with our members we focus on international collaboration to help solve global water issues and ensure a sustainable and water driven future.

The NWP network consists of companies, government agencies, NGOs and knowledge institutions. Being a connector, NWP has access to up-to-date knowledge and a large (inter)national network that goes beyond the water sector. We know the markets and can quickly identify opportunities and possible risks. NWP helps you make valuable connections, create visibility and enable collaborations.

**Join our strong and innovative network of Dutch water organisations and drive your international ambitions to the next level for a Water. Driven. Future**
