Preface

WELCOME TO THE NETHERLANDS PAVILION AT WEFTEC 2023!

This year the Netherlands Pavilion presents 12 innovative technology providers from the Dutch water sector. As members of the Dutch water sector, we believe in the power of collaboration and the collective strength it brings. Together, we can make a significant impact on the global water industry, let's solve global water challenges together!

Dutch expertise

The Dutch water sector has long been recognized for its innovative solutions, sustainable practices, and expertise in water technology and water management. We invite you to connect with the Dutch technology providers at the Netherlands Pavilion, to get inspired by the proven technology presented, and to profit from the knowledge and expertise that the Dutch have built up with successful execution of many projects around the world.

Join our networking sessions

As organizers of the Netherlands Pavilion, the Netherlands Water Partnership and Water Alliance are proud to present the breadth and depth of our industry's capabilities to you at WEFTEC 2023. Browse the program in this booklet and join us for one (or more) of the networking and knowledge sharing sessions that we host this week in beautiful Chicago!

Made possible by WTEX10

The Netherlands Pavilion at WEFTEC 2023 is a joint collaboration between Water Alliance and the Netherlands Water Partnership (NWP). It is funded by the WTEX10 program, which is an initiative of the Dutch government, the Ministry of Economic Affairs and Climate Change, the Ministry of Infrastructure and Water Management, and Top Sector Water & Maritime in cooperation with Water Alliance and the Netherlands Water Partnership (NWP).

From Water Alliance and NWP, Hein Molenkamp, Stefan Bergsma, Tiemen Jousma and Marieke Leenhouts are present at the Netherlands Pavilion. Please feel free to contact them if you have any questions.

Best regards,
Team Netherlands Pavilion @WEFTEC 2023

Program overview

Networking reception

The Embassy of the Netherlands in the USA and the Consulate General of the Kingdom of the Netherlands in Chicago are pleased to invite you to a networking reception on October 2nd from 4 – 5 PM at the Netherlands Pavilion at WEFTEC 2023, booth 8527.

Monday 2 October
04:00-05:00 pm
Booth 8527

The event is aimed at connecting the Dutch water sector to international partners, collaborators, innovators, and potential (launching) customers. The networking reception is open to all WEFTEC attendees who wish to attend, no RSVP needed.

Presenting Dutch innovations for European & US Challenges

Create Connections. Transform tomorrow. Tuesday 3 October is your chance to discover all about Dutch innovations and how the Dutch can help you, be it on global or US-related water challenges. As the Netherlands is renowned for their water inventiveness, this session provides a unique first-hand experience to pressing issues and their solutions.

Tuesday 3 October
10:00 -11:00 pm
Global Center
Booth 605

Company profiles

Acquaint
 Zwettestraat 27
 8912 AV Leeuwarden
 The Netherlands
 +31 853 032 782
 info@acquaint.eu

@ WEFTEC:

Edzer Kooistra

Erik Driessen

Acquaint has developed an inline inspection technology for pressurized water and wastewater pipelines using ultrasound technology with limited to no service interruption. Acquaint's pigging-tool the ACQUARIUS delivers accurate XYZ mapping and detects many failure mechanisms in a broad range of pipeline materials and diameters. Our partner in the USA is CPM Pipelines.

@ WEFTEC:

Annelie Koomen

Margit Fotré

Walter van der Schoot

Aquatech is the world's leading platform on technology & solutions to drive a sustainable water future. A global online community with news, views and analysis for professionals in watertech and water management including trade shows in Amsterdam, China & Mexico

Berghof Membrane Systems

LG Sonic

Berghof Membrane Systems

@ WEFTEC:

Alfredo Crespo

Tobias Steube

Berghof Membranes is the leading manufacturer of tubular membranes for the filtration and separation of industrial process streams and wastewater. With 50 years of experience and over 2,000 installed systems across the globe, Berghof Membranes prides itself on the robustness, flexibility, energy-efficiency and superior quality of its external filtration membranes and solutions.

@ WEFTEC:

Ernest Neafsey

Greg Eiffert

Lisa Brand

LG Sonic leads the way in producing cutting-edge technologies to monitor and control algae blooms sustainably and effectively. Dedicated to restoring aquatic ecosystems without the use of chemicals or pollutants, we operate in the United States and in over 55 countries worldwide.

Membrane Systems Europe

Membrane Systems Europe

David Ricardostraat 6
7559 SH Hengelo

@ WEFTEC:

Marieke Leenhouts

The Netherlands Water Partnership (NWP) is an independent, non-governmental foundation, established in 1999 in response to calls for more cooperation and a strong voice for the Dutch water sector in the international market. Since then, encouraging collaboration for the sector at home and abroad has been at the core of NWP's mission.

NWP implements programs that promote cross-sector collaboration and innovation, by building coalitions around themes or regions to increase collective impact, increase the international visibility of the Dutch water sector, and join forces to positively influence policy and contribute to achieving the UN Sustainable Development Goals.

We do this by, amongst others, organizing trade missions, learning weeks, study tours, Netherlands Pavilions at international events, matchmaking, and promoting the Dutch water sector via the international NWP media outlets.

As a connecting party, NWP maintains strong relationships with the global water sector and, with its broad network organization of over 180 members, can connect individuals in the water sector who do not always find each other in their immediate environment.

@ WEFTEC:

Barbara Berson

UVOX REDOX® ADVANCED
UV-OXIDATION

FINDING SUSTAINABLE SOLUTIONS
TOGETHER

The patented UVOX Redox® advanced UV-Oxidation process contributes to sustainable water management in many industries by keeping natural water resources in its most natural form, re-using water and giving water back to nature.

Effective inactivation of resistant microorganism (up to 5 LOG reduction)

Efficient removal of micropollutants (s.a. hormones, antibiotics, or pesticides)

A sustainable and chemical-free solution

@ WEFTEC:

Hein Molenkamp

Tiemen Jousma

Stefan Bergsma

The Water Alliance is a unique partnership of public and private companies, government agencies and knowledge institutes involved in water technology in the Netherlands. The Water Alliance focuses on innovative and sustainable water technology that can be used worldwide. It brings together a complete chain of innovation for water technology, from first idea, research & development, specialized laboratories, a water application centre, various demosites, launching customers to international applications with commercial companies. Indeed from knowledge to business. It is driven by the idea that technological development and innovation is needed to develop new markets and thus create new business opportunities for the water technology industry. In this way the Netherlands will become the European Water Technology Hub, with its focal point at the WaterCampus Leeuwarden.
