Plenary: Strengthening Water Resilience Through Nature-Based Solutions, Innovation & Collaboration

Kingdom of the Netherlands

- **Mobilizing** Dutch ministries, embassies, and technical agencies alongside regional governments
- **Identifying and connecting** water-tech innovators with real investment pipelines
- **Strengthening coordination** across utilities, private operators, local solutions technical providers and communities

- **Leveraging** multilateral development banks like the Inter-American Development Bank (IDB)
- **Expanding access** to international climate and water grants
- **Creating bankable, nature-positive projects** through public-private partnerships (PPPs)
- **Prioritizing operations** that integrate efficiency, affordability, scalability and resilience

- **Training for utilities**, municipal actors, communities, and regulators on NbS, wastewater reuse, desalination and water quality assurance
- **Showcasing replicable models** — including Dutch Caribbean case studies
- **Developing career pathways** for young water professionals in the region

Thank You
